Large Airport Features, with Small Airport Charm and Value

Phone: 815-232-1078

www.cityoffreeport.org/business/albertus.htm

Welcome to Albertus Airport, in Freeport Illinois

Small Airport Charm with Large Airport Features

Come enjoy the ease and cost effective benefits of basing your cabin class aircraft at a small airport, but with the features found at larger airports.

The well lighted new hangar bays have concrete floors, are fully insulated, and are sized to handle any cabin class corporate aircraft.

With Full ILS system approach, 5,500' L x 100'W fully grooved paved runway, you can land your corporate aircraft even in poor weather conditions. The Class "D" airspace makes ILS flight planning easy and the airport is free of many TSA regulations.

Full Service FBO

The full service FBO offers small town friendliness and service that includes competitively priced on-field 100LL and Jet A fuel, a Free Wireless Internet hotspot, DTN Weather Service, and remote communication to Rockford-Chicago International Airport (RFD). There is also on-field Full-Service Maintenance for most types of aircraft.

The Cost Effective Alternative

At \$450.00/month Lease payments, with no hidden fees, this is an opportunity for inexpensive no-hassle storage of your cabin-class aircraft.

Don't Delay

With only three hangar bays available, they will go fast!

There are many ways to contact us to learn more about this opportunity. Our website has pictures and more detailed information about the airport and new hangars. You can always call or e-mail with any specific questions or to setup a time for visit and tour. All contact information is on the back of this brochure.
